Introducing AquaVivos™ - Mother Nature's Most Powerful Anti-Oxidant

Mother Earth Minerals is proud to introduce a revolutionary new product called AquaVivos™ to our loyal distributors and customers. Dr. Ott has continually stressed the importance of proper HYDRATION in his books and lectures. The primary function of water on living cells, both animal as well as plants, is to provide essential molecules of hydrogen and oxygen, with electrons intact, to the interior of the cell. Without available hydrogen and oxygen electrons, the cells have a very difficult time producing energy in the form of ATP (adenosine tri-phosphate). Dehydrated cells function primarily by means of fermentation processes. One of the by-products of cellular respiration and the production of

ATP is an unstable molecule of oxygen that has simply lost electrons following the ATP production cycle. This unstable oxygen molecule is called an Oxygen Free Radical. Other electron deficient elements and compounds such as toxins released from heavy metals, chemicals and excretions from pathogens such as parasites, viruses, and bacteria are also unstable "free radicals" and are continuously attacking the cells in order to gain electrons. The more free radicals present in the body, the more stress is created on the cellular level, and the more likely one is likely to develop a chronic disease state. For instance, it is commonly recognized that cancer is ultimately caused

AquaVivos™ is derived from phyto-nutrients called PolyPhenols - extracted from organic CARROTS!

by excessive free radicals attacking cellular DNA structures. Furthermore, it has been widely recognized in nutritional circles that the potential "healing power" of any natural fruit or vegetable is tied to its polyphenol count—or in other words, in its ability to neutralize dangerous free radicals; or its anti-oxidant potential.

The Finest Possible Home Steam Distillation "Countertop" Unit Now Available.

Mother Earth Minerals is proud to offer a steam distiller unit for your home that is small enough to actually sit on your kitchen counter. To get the highest and best use out of the AquaVivos product in all of its possible functions, it is recommended to use the highest

quality water possible. There is little doubt that a quality home steam distiller is the best choice. We have tested many units currently on the market, and have determined that the highest quality unit for the dollar is provided by PureWater, Inc.

located in Lincoln Nebraska. Each unit has a 15 year warranty, and the water produced is typically free of VOC residue common to other home distillation units. Call us today at 866-989-9876 for pricing information and details.

AquaVivos Facts (Cont. from Page 1)

Simply stated, the higher the raw vegetable's polyphenol level, the higher its ability to neutralize free radicals in a natural, non-hazardous chemical process, and thus, the higher the potential "healing energy" of the vegetable. This helps to explain why many individuals have boosted their immune systems and successfully reversed a wide variety of chronic disease states simply by juicing raw vegetables and limiting their consumption of red meats. The product named AquaVivos contains concentrated polyphenols extracted from root vegetables such as carrots, onions, turnips, radishes, and soy root. The polyphenols are then stabilized by an electro-

Onions are also a part of AquaVivos

magnetic process, whereby their basic micelle molecular structure generates massive HYDROGEN BASED free electrons to medicinal grade, ultra pure water. In turn, these free electrons are able to massively neutralize free radicals in the body.

CAN THIS BE DANGEROUS?

Recent findings have indicated that certain potent SYNTHETIC anti-oxidants have the potential to restrict glucose synthesis in cells, resulting in diabetes. Therefore, it is reasoned that a certain level of free radical activity is needed for optimal health. In answer to this, one must keep in mind just how free radicals are formed in the body. It is true that certain chemical "anti-oxidants" limit the level of free radicals, but

how is this accomplished? It is true that lowering the rate of cellular respiration will result in a corresponding reduction in free radical activity, and this is exactly what often happens in such antioxidants as concentrated, synthetically produced vitamin A and E. Of course, once the cellular respiration process is restricted, glucose synthesis is likewise altered, insulin levels fluctuate and hypoglycemia and/or diabetes may indeed become the eventual result. Polyphenols, however, have been shown to utilize oxygen and hydrogen free electrons to neutralize the unstable free radical molecules without restricting the cellular respiration factors in any way. As a matter of fact, increasing the availability of oxygen and hydrogen electrons also may stimulate the cell to increase respiration—which is typically very positive!

"Trial of the Century" DVD by Dr. Ott Selling Strong

Have you ever wondered how the modern allopathic "Medical Establishment" came into being? Have you ever wondered why so few physicians know very little if anything about the power nutrition and natural foods have on health and healing? Have you ever wondered who sets the curriculum of medical schools? Why are physicians today trained to be little more than pharmaceutical drug pushers and salesmen? More importantly, why is Cancer killing more Americans today per capita than 50 years

ago, despite nearly a trillion dollars spent on research? Find out who has been manipulating health care in America for nearly a century! In this hard-hitting research documentary, A. True Ott, PhD exposes the truth in this DVD copy of his seminar presentation.. If knowledge truly is power, then this

DVD is turbo-charged. While the majority of health-care practitioners in America are truly thoughtful and caring professionals, the fact remains that "the system" is in dire need of an overhaul. Many Americans cannot afford health insurance, and senior citizens are being imprisoned by daily drug expenditures. This DVD exposes many of the root causes. Order yours today!!

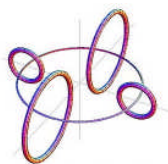

"The Trial of the Century DVD is a 'must-see' for all Americans.

I am sending dozens out to my friends and neighbors." —

Wayne Pickering

AquaVivos™ Recommended Protocol

AquaVivos™ is packaged as a concentrate in an 8-oz. bottle. The best way to ingest these powerful vegetable polyphenols is to place it in water and drink it on a daily basis. It is recommended to place 1 ounce of the concentrate in one gallon of the purest water you can find, (preferably steam distilled wa-

Energy Fields Enhanced by Redox technology.

ter, with R.O. water a 2nd choice) and let it "activate" in the refrigerator for 24 hours before drinking. Since there are 128 fluid ounces in a gallon, this will dilute the concentrate by a ratio of 128:1. Tests conducted at ABC Labs in Florida concluded that the polyphenols in AquaVivos effec-

tively eliminated generic E-Coli bacteria at a dilution of 300:1, and was effective against methicillin-resistant Staph up to a dilution of 24:1. Therefore, you can add 1 oz. to 2 gallons of water for a very safe and cost-effective spray to help protect your family against any E-coli present on your raw vegetables!

7 Fantastic Alternative Ways to Use the AquaVivos™ Product

There are numerous ways to utilize the free electrons in AquaVivos besides enhancing your drinking water. Here are just a few other uses.

1. AquaVivos has been tested by ABC Labs in Florida and found to be a powerful anti-biotic and anti-viral agent—even effective in specific concentrations against methicillin-resistant staph. At 1 to 32 dilution, this makes a great bathroom cleaner. Place it in a mist or spray bottle to disinfect hands and toilet seats after use.
2. Place 1 oz. in 1/2 gallon of distilled water, and use as a very

effective underarm deodorant. At this dilution, it is also a very effective mouthwash and a great alternative to potentially toxic fluoride toothpaste.

3. At a 1:1 dilution with distilled water, AquaVivos is very effective as a facial astringent and moisturizer. Teenagers report it being extremely effective anti-acne blemish solution.
4. At 1:20 dilution, rub it into the coat of a dog or cat that has fleas, ticks, or chiggers— and watch what happens. (The polyphenols interfere with the internal oil of the parasites, causing

them to suffocate and die—all without harsh chemicals.)

5. Dilute 1:20 and apply it to the roots of plants, especially house plants. You will find that your plants will require much less water—and will help them remain healthy.
6. Dilute 1:10 and spray it on roses and ornamentals to control aphids and other microscopic parasites. (See use #4).
7. Dilute 1:32 for a very effective nasal spray. This will help keep the sinuses moist and free of virus and bacterial infections.

How AquaVivos™ Enhances Water Molecules

The concentrated polyphenols in AquaVivos™ are electron donors, that are able to charge and “energize” the hydrogen and oxygen molecules in pure water. This results in a substantially lower surface tension between the hydrogen and oxygen molecules which in turn equates to superior hydration at the cellular level. The great French biochemist Louis Pasteur, in addition

to pioneering the “pasteurization” method of preserving milk, discovered that both plant and animal cells exhibit a specific point where ATP production shifts from oxygenation to the much less efficient fermentation process. Known as the “Pasteur Point” in the

scientific community, it has become obvious that maintaining this all important “Pasteur Point” is key to health and longevity. It is basically impossible to maintain the Pasteur Points in the cell without proper hydration—and this is where AquaVivos truly shines.

RED-HOT Spring Specials

DISTRIBUTOR SPECIALS:

For the Months of March and April we are pleased to offer a 30% discount from the retail price on any purchase of AquaVivos™ when you mention this newsletter. Wholesale accounts can receive a 10% discount when purchasing AquaVivos by the case.

Don't forget that AquaVivos works best when placed in steam distilled water. Mother Earth Minerals is

Ready to WIN the Race?

pleased to offer a full line of personal home water distillers that can fit most any budget. Take a full 10% discount off the retail price when purchased with a bottle

of AquaVivos. Give your family and friends the gift of pure water today—it is literally the gift of life.

Call our office (866-989-9876) today for more information on our monthly specials and volume discounts for professionals and wholesale accounts.

Creating ULTIMATE ELEMENTS

Call us Today!
1-866-989-9876

Mother Earth Minerals Inc. (MEM) provides information and nutritional counseling to a growing number of individuals seeking answers to health care puzzles, and was founded by A. True Ott, PhD in December, 1998. All intelligent life on Planet Earth is governed, either for good or evil, by electromagnetic impulses on the cellular level. The great healers throughout recorded history have had one thing in common, they understood how these impulses operate and were able to successfully harness them for the benefit of mankind. MEM is dedicated to the positive exploration and public dissemination of this vital, lost knowledge. Remember, MEM's the WORD!

When Life gives you Lemons, it's Time For Lemonade!! By A. True Ott, PhD

Let Medicine be your Food, and let Food be your Medicine!

Hippocrates, the “Father” of Modern Medicine!

Certain health breakthroughs come only once in a lifetime, and this is what appears to be the case with our amazing new product called “AquaVivos”. We have tested the product in various focus groups, suffering from a myriad of health challenges since October of 2006, and the results are simply spectacular. Before introducing any new product, of course, we had an FDA-certified lab test it for what is called the LD-50 level, or in other words—the level of toxicity causing death in 50% of the rodents tested. The lab injected by hypodermic needle, the

equivalent of 5,000 milligrams of CONCENTRATED AquaVivos to the ratio of a kilogram of the test rat's body weight as the starting point of the toxicology study. It was fully expected that the test rats would not survive that much product being injected into them, but they not only survived the required 14 days, but actually exhibited signs of superior nutrition, such as glossy fur, increased energy, low stress, etc. Therefore, the lab certified that the product's LD-50 rating is simply greater than (>)5,000 mg./kg. body weight. This is incredible news, because it means that AquaVivos is over 100 times less toxic than pure table salt. It also means that the product can be used safely and with confidence in its many different applications. We are so blessed to be able to report that many of the chronic health challenges tied to poor hydration factors (cancer, diabetes, arthritis, atherosclerosis, etc.) may possibly be reduced with regular consumption of this miracle of the vegetable kingdom. We understand with all due humility, that all credit for the development of AquaVivos must rest with the master creator of the polyphenol molecules as found in nature—for without them, the AquaVivos product would not be possible. Thanks!
