The Importance of Minerals in the Human Diet

Dr. Linus Pauling, one of the most brilliant bi-chemists of our time, in the twilight of his remarkable career that included two Nobel Prizes declared: "You can trace EVERY disease, every sickness, illness and disorder, ultimately to a MINERAL DEFICIENCY." For the average allopathic physician trained by the pharmaceutical industry's various medical schools in North America, this sweeping declaration is bound to raise eyebrows with the accompanying charge of "quackery". Modern science, as well as quantum physics, however, is continually validating the truth inherent in Dr. Pauling's research findings.

From the very moment of conception in the mother's

womb, the pluripotent stem cells of the human fetus utilize hydrogen, oxygen, and various mineral ions from the mother's blood to form diverse cells of tissue that develops into organs, and cartilage that eventually will become the bones of the human skeleton. A quick analysis of the tissue, organ, and bone structure of a newborn baby (as well as that of a mature adult for that matter) will confirm the truth: the infant is nothing more than water and approximately \$5 worth of mineral elements. Yet, the infant is infinitely priceless to their loving, and nurturing family. The miracle of life simply involves hy-

drogen, oxygen (H₂O) and minerals. Simple logic would then dictate that the "blessing" of good and vibrant health is likewise tied to correct hydration principles and a continuous supply of primal earth mineral elements. This is the basic foundation of proper nutrition principles.

The Importance of Minerals (from Pg. I)

Much has been written about topics such as protein diets, restricting carbs, supplementing enzymes, and vitamins over the years. What has not been explained, however, is the truth that the basic "building blocks" of all amino acid chains that eventually form proteins, carbohydrates, enzymes and vitamins are specific MINERALS from the earth. The human body is a truly amazing machine that can manufacture hundreds of chemicals, vitamins, hormones, and proteins on the cellular level. However, it can accomplish this only when mineral ions are present, and in the correct

particle size. Just as a manufacturing assembly line can only produce a finished product when it has a ready supply of component parts available, so too are the human organ, bone, and tissue cells dependent on various mineral elements carried to them in the blood to manufacture a multitude of chemical enzymes critical to maintaining health and wellness, while greatly reducing the risk of debilitating disease conditions. Understanding the mechanisms of mineral synthesis is what led Dr. Pauling to make his sweeping statement of fact. Don't forget that Hydrogen is an element on the periodic table, albeit a gaseous element. Suffice it to say,

that ENERGY ITSELF - the very "God Particle" of Quantum Mechanics, is therefore dependent upon a ready supply of basic mineral elements. When mineral elements are restricted, or lacking altogether, the cells become energy deficient and eventually and inevitably, a "dis-ease" state results.

Fortunately, the human cell has programming provided in the DNA to repair and regenerate itself. Wounds heal. Disease states can repair and regenerate as well. The rate in which "healing" occurs, however, is dependent on a number of factors. Are the correct minerals, hydrogen, and oxygen readily available to produce the energy needed by the new cells? Can the brain understand the importance of eliminating negative emotions and replacing it with love and harmony?

"Trial of the Century" DVD a "Must-See"

Have you ever wondered how the modern allopathic "Medical Establishment" came into being? Have you ever wondered why so few physicians know very little if anything about the power nutrition and natural foods have on health and healing? Have you ever wondered who sets the curriculum of medical schools? Why are physicians today trained to be little more than pharmaceutical drug pushers and salesmen? More importantly, why is Cancer killing more Americans today per capita than 50 years

ago, despite nearly a trillion dollars spent on research? Find out who has been manipulating health care in America for nearly a century! In this hard-hitting research documentary, A. True Ott, PhD exposes the truth in this DVD copy of his seminar presentation.. If knowledge truly is power, then this

DVD is turbo-charged. While the majority of health-care practitioners in America are truly thoughtful and caring professionals, the fact remains that "the system" is in dire need of an overhaul. Many Americans cannot afford health insurance, and senior citizens are being imprisoned by daily drug expenditures. This DVD exposes many of the root causes. Order yours today!!

Mother Earth Minerals Inc. (MEM) provides information and nutritional counseling to a growing number of individuals seeking answers to health care puzzles, and was founded by A. True Ott, PhD in December, 1998. All intelligent life on Planet Earth is governed, either for good or evil, by electromagnetic impulses on the cellular level. The great healers throughout recorded history have had one thing in common, they understood how these impulses operate and were able to successfully harness them for the benefit of mankind. MEM is dedicated to the positive exploration and public dissemination of this vital, lost knowledge. Remember, MEM's the WORD!

When Life gives you Lemons, it's Time For Lemonade!!

By A. True Ott, PhD

Truth wears no mask, she seeks neither place nor applause, bows to no human shrine; she only asks a hearing.-----Anon

As I travel and interact with various groups of people in this great country, it is extremely heart-warming to hear and document the many incredible success stories and testimonials concerning the message of Mother Earth Minerals. It is important to understand that NO PRODUCT is itself responsible for healing any specific disease state. We at Mother Earth Minerals do not focus on disease, we instead focus on HEALTH and VITALITY. The TRUTH that today needs a HEARING is that the specter of disease is simply a product of stress, trauma and imbalance on the cellular level. One of the basic factors of

cellular stress and trauma on the cellular level is a shortage of prime, absorbable minerals elements. Minerals elements are the "co-factors" in literally hundreds of biological transmutations in the human body. For instance, the vitally important digestive enzyme trypsin can only be manufactured in the human pancreas if specific minerals are present in sustainable quantities. It has been well-documented since the 1950's that low trypsin levels have been linked to many disease states, including cancer. While it is safe to declare that every person desires to maintain youthful health and vitality, it may be upsetting to some to realize that so-called "disease states" are happening in each person. The human body is composed of over 70 TRILLION individual cells. These cells are in a constant cycle of growth, evolution, division, and eventually death. It is tremendously naïve to assume that there is not some specific percentage of these trillions of cells that are daily experiencing imbalance and mutation into cancer cells, or some other dis-ease state. The SECRET is simply to understand the process, eliminate FEAR from the psyche, and embrace the principles of HEALTH found in simple nutritional science.
